## PROJECT HANDLED

### PROVIDING FILE SECURITY IN PUBLIC CLOUD INFRASTRUCTURE

We develop the project is to provide file security in the public cloud environment and to provide a mechanism to prevent the common web vulnerabilities attacks. It not only provide file storage but also block the intruder to avoid future attacks possibilities by providing security using encryption.

### CURIE CARE

We develop mobile application to solve the problems between the clinics and patients. It helps outpatient management & care for every private practitioner. Our healthcare apps empower people to connect with their doctors easily. Our application provides feature for Admins, Doctors and Nurses to do hospitalization and track the patient histories. Based upon the doctor's availability, patients can book the appointment. It is not only focused on online booking, It allows nurses to create an appointment for walk-in patients at the stage of waiting room.
